Fullerton College – Fullerton, CA

Received an Associate of Arts Degree in Business Administration

PERSONAL

Since I can remember, I've always been interested in technology, from playing old MS-DOS games to building my first computer. I fell in love with coding when I found [codecademy.com](https://www.codecademy.com/), from then on, I looked for any online course to fuel my desire for web development. I'm a huge football fan, and my latest hobby is trying my hand at golf.
